# Dear Customer

---

«The only constant in life is change» –

Even after two and a half thousand years, this famous quote by Greek philosopher Heraclitus has not lost its validity.

Freely inspired by Heraclitus, we have changed our Colltex products, improved their quality and made them more trendy. Together with fresh designs, three innovative technical developments promise an all-round and consistent performance: the new front-end fastening, the additional Drybase coating, and the new LUCENDRO ski skins.

What you will get out of it? Markedly improved «uphill opportunities» – with optimum handling and even better performance on the mountain.

With best regards from the Glarus region,

*H.P. Brehm*

Hans-Peter Brehm  
Managing Director Colltex AG

Colltex is an official partner  
of the Swiss Mountain Guide Association SMGA

SWISS SKI SKINS

## 22/23 Novelties

### Crystal Collection

The Crystal Collection has been inspired by the very essence of the Alps, the hexagon of a crystal. The result is a visually and technically sophisticated overall design.

→ page 04

### Hexagon Front and Tail Fastening

We have redeveloped the front and tail hooks and integrated them into the overall design – for even better handling and maximum performance on the mountain.

→ page 13

### LUCENDRO Ski Skins

With our LUCENDRO ski skins, we are launching a new type of ski-skin construction with some truly remarkable properties.

→ page 17

### Drybase Coating

The additional treatment of the back of the ski skins with the Drybase technology prevents water absorption and provides an optimum bond to the hotmelt adhesive.

## THE NEW COLLTEX SKI SKINS

# Inspired by nature. Adapted to nature. Depending on conditions. Depending on the demand.

The «Crystal Collection» was inspired by Alpine nature. The hexagon of a crystal provided the inspiration for the linear structures of a graphically and technically valuable general design.

We are proud to offer our customers a new ski-skin collection with varied material compositions, but always meeting the highest possible quality standards:

- RACE Crystal ————— SPEEDMASTER ————— 100% mohair
- PALÙ Crystal ————— ALPINIST ————— 100% mohair
- TÖDI Crystal ————— ALLROUNDER ————— 65% mohair | 35% synthetics
- LUCENDRO Crystal ————— NEWCOMER ————— 100% techfibre

With these four Colltex ski-skin models, we are able to meet the whole range of possible demands: from maximum gliding properties for racers to maximum grip on the mountain for all-rounders. And always part of the design: the reliable hotmelt strategy with Drybase coating.

«And there is magic in every beginning»  
Hermann Hesse

This is also true for the beginning of any  
ski tour – so put your skins on and let's go!

Follow our «Four on Tour»: Bettina, Simone,  
Fabian, and René on their magical-mystery  
tour.

## RACE CRYSTAL SPEEDMASTER

The fastest racing skin for competitors and athletes

MATERIAL	<b>100% MOHAIR</b>
SKIN COLOUR	<b>YELLOW</b>
ADHESION	<b>HOTMELT ADHESION Technology</b>
WEIGHT	<b>98 G [6 MMX150 CM]</b>
GRIP	
GLIDE	
DURABILITY	

### Properties

The RACE probably are the fastest ski skins on the market. Made of 100% mohair, they were designed for even more perfect gliding. The compromise is a slightly less powerful grip. When not in use, we use a special net to protect the hotmelt adhesive coating.

### Target Group

We recommend RACE to racers and athletes for both training and competition uses. It is also a good choice for ambitious ski tourers.

### SKIN CUTS

#### Straight skins

Skin widths: 55, 60, 62, 65, 70 mm with Racefix for speedy attaching and detaching, skin: 170 cm

#### Skin on rolls

Skin length: ca. 33 m, skin widths: 55, 60, 62, 65, 70 mm

#### RACE Box

Straight-cut ski skins (60 or 62 mm) without tail hooks  
1 pair of RACE skins  
1 pair of training skins  
1 wax, 1 headband

## PALÜ CRYSTAL ALPINIST

The ski skins with top gliding characteristics for experts

MATERIAL	<b>100% MOHAIR</b>
SKIN COLOUR	<b>ANTHRACITE</b>
ADHESION	<b>HOTMELT ADHESION Technology</b>
WEIGHT	<b>105 G [6 MMX150 CM]</b>
GRIP	
GLIDE	
DURABILITY	

### Properties

The PALÜ ski skins are our leading product. They glide perfectly thanks to its 100% natural fibre – especially on fresh, dry, and cold snow. The wear and tear on hard, icy snow is slightly higher. When not in use, we use a special net to protect the hotmelt adhesive coating.

### Target Group

We recommend PALÜ for long ski tours, Alpine tours, and touring experiences lasting several days. It is suitable for sports tourers, for whom gliding is important.

### SKIN CUTS

#### Custom-made

CAD-cut to the desired ski model

#### Cut-to-size ready

DIY cutting, ski lengths: 150-195 cm, (see page 22)  
skin widths: 110, 120, 130, 140 mm

#### Cut-to-size standard

DIY cutting, skin: 167 cm [Ski – 185 cm],  
177 cm [Ski – 195 cm], skin widths: 110, 120, 130, 140 mm

#### Straight skins

Skin lengths: 160, 170, 180 cm, skin widths: 35 – 90 mm

#### Skin on rolls

Roll length: ca. 33 m, skin widths: 31 – 140 mm

#### Splitboard

Cut to the desired splitboard model  
DIY cutting, skin length 170 cm, skin widths : 150, 160, 170 mm

## TÖDI CRYSTAL ALLROUNDER

The robust all-rounder – for anyone from beginners to professionals

MATERIAL	<b>65% MOHAIR + 35% POLYAMIDE</b>
SKIN COLOUR	<b>BLUE</b>
ADHESION	<b>HOTMELT ADHESION Technology</b>
WEIGHT	<b>102 G (6 MM X 150 CM)</b>
GRIP	
GLIDE	
DURABILITY	

### Properties

The TÖDI ski skin is the best-selling skin at Colltex. The TÖDI is an optimum combination of the aspects of gliding, climbing, durability, and packing size: a ski skin for all types of snow and weather. When not in use, we use a special net to protect the hotmelt adhesive coating.

### Target Group

The TÖDI is an all-round ski skin and recommended for any ski tourer. It is equally suitable for beginners demanding good grip or mountain guides desiring a skin that will have a good grip in all weather conditions.

### SKIN CUTS

#### Custom-made

CAD-cut to the desired ski model

#### Cut-to-size ready

DIY cutting, ski lengths: 150-195 cm, (see page 22)  
skin widths: 110, 120, 130, 140 mm

#### Cut-to-size standard

DIY cutting, skin: 167 cm (Ski - 185 cm),  
177 cm (Ski - 195 cm), skin widths: 110, 120, 130, 140 mm

#### Straight skins

Skin lengths: 160, 170, 180 cm, skin widths: 35 - 90 mm

#### Skin on rolls

Roll length: ca. 33 m, skin widths: 31 - 140 mm

#### Splitboard

Cut to the desired splitboard model  
DIY cutting, skin length 170 cm, skin widths : 150, 160, 170 mm

## LUCENDRO CRYSTAL NEWCOMER

The ski skins with good grip for ski tourers out to enjoy themselves

MATERIAL	<b>100% TECHFIBRE</b>
SKIN COLOUR	<b>HIBISKUS</b>
ADHESION	<b>HOTMELT ADHESION Technology</b>
WEIGHT	<b>111 G (6 MM X 150 CM)</b>
GRIP	
GLIDE	
DURABILITY	

### Properties

The LUCENDRO with the techfibre construction ski skins are ski skins of the latest generation. The new fibre was developed over a period of several years by Colltex as part of an interdisciplinary team and stands for very good climbing properties, yet allowing excellent gliding, too. The raw material is produced by a Swiss spinning mill. As a world first, these ski skins can be individually printed in small batches.

### Target Group

We recommend LUCENDRO for ski tourers who are looking for a particularly good grip of their ski skins, but do not want to stint on glide. The product is ideal for beginners and all-round ski tourers as well.

### SKIN CUTS

#### Custom-made

CAD-cut to the desired ski model

#### Cut-to-size ready

DIY cutting, ski lengths: 150-195 cm, (see page 22)  
skin widths: 110, 120, 130, 140 mm

#### Cut-to-size standard

DIY cutting, skin: 167 cm (Ski - 185 cm),  
177 cm (Ski - 195 cm), skin widths: 110, 120, 130, 140 mm

#### Straight skins

Skin lengths: 160, 170, 180 cm, skin widths: 35 - 90 mm

#### Skin on rolls

Roll length: ca. 33 m, skin widths: 31 - 140 mm

Ski tourers know:  
**Every tour is a little adventure.**

**This is also true for our four heroes, who discover a mysterious cave with a shimmering crystal inside – which provided the inspiration for the new Colltex technologies.**

To watch the whole video of the «Four on Tour», head to: [www.colltex.ch](http://www.colltex.ch)

## THE CRYSTAL

# Inspired by alpine nature.

Our new 22/23 ski-skin collection now underlines Colltex's claim as a leading brand on a visual level, too – with a new, thoroughly styled design concept.

This concept includes a new visual appearance, new colours, and innovative features. From the front hook to the fibre pile to the end fastening – all the details of our collection form a coherent design family whose overarching appearance is clearly visible as a design match.

With the new designs, the Colltex label communicates its Swissness brand value: modern, high-quality, and straightforward – but far from conservative. Offering high performance – without being too technical. In short: a product with a WOW factor!

Starting with the snow crystal, we used a crystal shape, the hexagon, as the basis for our new designs – constructions, shapes, and patterns, that is. Because the hexagon is ideally suited to technical tasks as well as to designs, the new crystalline lines are consistently reflected by all elements of the new collection.

As far as pile colours are concerned, we continue to stick to the familiar Colltex colour palette: anthracite for the PALÙ ski skin in 100% mohair and blue for the TÖDI model in a material mix. For RACE, we shall be using yellow instead of violet in the future – according to the «fun fact» that among Italian racers yellow is considered the fastest colour of them all. LUCENDRO, the new ski-skin model, has been given a hibiscus shade to complete the Colltex colour palette.

## HEXAGON FRONT ATTACHMENT

# From the idea to the perfect design.

A good front attachment needs to do many things. It should fit on every ski tip and ski thickness, be easy to handle, and be light, stable, and appealing in design, too. For the new Hexagon front hook, we have combined our long proven know-how in the development of attachment systems. Thus, the new HEXAGON sets new standards in terms of handling and flexibility.

The HEXAGON front hook combines the following features:

- no lateral slipping when attaching
- fits on any radius of ski tip
- fits all ski thicknesses up to 9 mm
- the fine-grained structure of the front hook does not promote snow build-up
- curved edges make it easy and comfortable to use
- low weight and pack size
- modern, technical, and functional
- stable material made of spring steel/stainless steel
- hook and tip cap form a unit
- discreet branding

*Easy and pleasant operation*

*Modern, technical and functional*

*From the idea*

HEXAGON END FASTENING

# From the idea to the perfect solution.

Even a tail hook has to fulfil many requirements. It should be suitable for being reliably attached to the ski, be robust and easy to use. Here, too, we have applied our many years of professional know-how in the development and production of tail attachments. Thus, the new Hexagon tail hook has numerous decisive advantages.

Advantages of the new Hexagon tail attachment:

- optimum handling due to the ergonomic shape of the tail hook
- the slightly stretchable tape makes it easy to attach the hook to the ski
- the hook can hardly be knocked off the other ski as the tape lies flat
- perfect for any ski thicknesses up to 8 mm
- UV-resistant and durable material
- as soon as the tape is adjusted, the hook can be easily attached and detached by pulling
- easily adjustable in both directions
- the hook cannot fall off the tape thanks to the retaining grid

Watch the video here:  
[www.colltex.ch](http://www.colltex.ch)

**With a lot of passion and professional know-how, the entire Colltex team is committed to the development and production of the new Colltex ski-skin collection.**

LUCENDRO

## Another good example of Colltex's innovative strength is the new Lucendro ski-skin model.

The new LUCENDRO with the techfibre construction model by Colltex is a ski skin of the latest generation. Its novel fibre was developed by an interdisciplinary team over the course of quite some years. Tests with this new fabric consistently showed good results as to climbing and gliding characteristics. Besides, the raw material is produced by a Swiss spinning mill.

We consider this techfibre ski-skin model to be a good addition or, depending on future developments, an alternative to today's mohair skin made of Angora goat hair. This is a ski skin for ski tourers who love a skin with a good grip and still want suitable gliding properties. As it is a world novelty, this ski skin allows us to individually print small batches. The respective colour designs are digitally printed and transferred to the ski skin.

Splitboarders take note:  
**Here Simone shows how to lay an optimum track with the splitboard – with the perfectly fitted splitboard skins by Colltex.**

**In future also available with the new, specially developed tail hook for splitboards.**

Watch the video here:  
[www.colltex.ch](http://www.colltex.ch)

## SPLITBOARD SKINS

# Innovation for the Splitboard-Touring Trend.

More and more tourers appreciate the advantages of a splitboard. To ensure that splitboard fans can always climb reliably, Colltex produces its own splitboard – the TÖDI and PALÜ models.

We also cut the skins to the exact fit for well-known splitboard models commonly available on the market. Alternatively, the skins can be cut to size yourself. These cut-to-size skins are available in widths of 150, 160 and 170 mm. The length is 170 cm.

The market offers various systems of tail fastenings. Colltex has already delivered trend-setting solutions. The sum of our experience flows into the new tail-hook model. Simple, flexible, valuable, and suitable for almost every splitboard.

For the correct cutting of a splitboard ski skin, head to:  
[www.colltex.ch/video](http://www.colltex.ch/video)

## COLLTEX DRYBASE

# New Ways to Coat Ski Skins.

The back of the ski skins is a fabric made of cotton and synthetics. New: the back of all Colltex skins is now additionally treated with a special coating. Only then, the proven hotmelt resin adhesive is applied.

This additional coat called Colltex DRYBASE has the following advantages:

**Hardly any water absorption:** the hollow spaces in the fabric are filled by Colltex DRYBASE. Thanks to this sealing, hardly any water can penetrate into the fabric back. The ski skin will remain dry and light even in warm snow conditions.

**Chemical bond:** the Colltex DRYBASE coating creates an optimum chemical bond to the hotmelt resin adhesive. The hotmelt thus adheres in an optimum manner to the back of the ski skin. This renders tearing off the adhesive very unlikely.

**More durable:** the Colltex DRYBASE coating makes the back of the ski skin more resistant to torsion, stronger and more durable – without losing its suppleness. The few grams extra of coating are compensated several time over as the ski skin hardly absorbs any water.

Our «Four on Tour» – Bettina, Simone, Fabian and René – reach the coveted summit and get ready for the well-deserved descent.

Watch the whole video here:  
[www.colltex.ch](http://www.colltex.ch)

## 10 SKI-SKIN TIPS

by a professional

### TIP 01 | Attachment

Before attaching the ski skin, dry the ski base, glue the ski skins to the skis and best press it directly down with a block of wax by stroking downwards from the tip (in the direction of the pile).

### TIP 02 | Walking Technique

Pull the ski within the track and try not to lift it. Your big toe should always touch the ground. This way the ski skin glides in an optimum manner, hardly forms any snow build-up, and you will save energy as well.

### TIP 03 | Sliding

Avoid sliding back on steep terrain by shifting your weight backwards to the heel. This will put your weight on the entire length of the ski skin, and its grip on the snow will improve.

### TIP 04 | Stride Length

Take shorter steps on steep or difficult stretches. In this manner, your centre of gravity will be better centred above the ski and stable.

### TIP 05 | Snow Build-Up

A change from moist to dry, cold snow can cause snow build-up. Remove the build-up and dry the ski skins with a cloth. Wax the skins in the direction of the pile.

### TIP 06 | Short Descents

When skiing downhill with ski skins attached, close the binding at the back to avoid falling forwards. However, long downhill runs on frozen snow put great strain on the pile.

### TIP 07 | Detachment

In windy conditions, put the ski on the ground with the binding turned downwards, fold back the rear half of the ski skin, attach the protective net and stick the second half of the skin onto it. As an alternative, use the Colltex pro-skin sock.

### TIP 08 | Repeated Attachments and Detachments

During a downhill course, stick your skins in the front of your jacket. Your body heat will make the skins cool down less and the grip will remain better.

### TIP 09 | Skin Adhesion Fails

Place adhesive layer on adhesive layer and thus reactivate the hotmelt adhesive. Or use practical Colltex quicktex. This will help with all ski skins.

### TIP 10 | Care and Maintenance

After the tour equals before the tour. Dry your ski skins, check their adhesive strength, and waterproof the skin sides. Reap the rewards of this procedure on your next tour.

## CUTS

Choose the shape of the ski skins

Colltex provides every ski skin on request already tailored to your ski model. However, if you prefer to cut your skins to size yourself, we can supply all the necessary tools. Two cut-to-size variants are available: «ready» and «standard».

### Custom-made skins

CAD cut to the desired ski model  
Front attachment: HEXAGON  
Tail attachment: HEXAGON

**CUSTOMMADE**

### Cut-to-size ready

For DIY cutting,  
Ski lengths 150-195 cm  
Skin widths 110, 120, 130, 140 mm  
Front attachment: HEXAGON  
Tail attachment: HEXAGON is mounted

For applications also see

Front attachment: HEXAGON  
Tail attachment: HEXAGON for self-assembly

For applications also see  
[www.colltex.ch/video](http://www.colltex.ch/video)

## COLLTEX CROSS-COUNTRY SKINS

Choose the right ski skin to ensure optimum performance

More and more cross-country skiers adopting the classic cross-country style rely on skis with ski skins as the construction of skis has improved and their handling is easy. By using a suitable cross-country skin, you will enjoy better climbing and gliding characteristics. To enjoy skiing to the full – depending on your technical ability or the topography of the trail.

The «**ALLROUND with its 65% mohair and 35% polyamide in blue**» offers a superb grip and good gliding properties. In case of hard, icy conditions but also in wet snow, this skin shows its special properties. It is suitable for skiers who appreciate a good grip or for steep cross-country loipes.

The «**BEST GLIDE with its 100% mohair in anthracite**» says it all. It glides perfectly and simply loves cold and dry snow. It is suitable for skiers who want maximum glide characteristics and prefer to make some concessions when climbing.

Changing these ski skins is easy. Remove the skins on your skis, stick them to the paper provided, dry the milled part, adhere the new skins from tip to tail, press down well and wax before skiing.

For more information, see [www.colltex.ch](http://www.colltex.ch)

Have fun on the trail!

## COLLTEX CARE PRODUCTS

Optimum ski-skin care

### Eco skinproof

Thanks to waterproofing with eco skinproof, the pile side of the skin absorbs less water, forms less snow build-up, glides better, and protects the ski skin against dirt.

→ Regularly waterproof the ski skin with eco skinproof, latest on the evening before the ski tour, so the waterproofing can dry. Tip: activate the waterproofing by heating it, e.g. with a hairdryer.

### Natural skin+ski wax 25g

The natural skin+ski wax works for all types of snow and is 100% biodegradable. Due to its handy size and the screw cap, this wax is perfect for use on the go.

→ When fitting the ski skin, press it down directly with the natural skin+ski wax. In case of snow build-up, dry the skin with a cloth and then apply the wax. The wax is equally suitable for the ski.

### Express universal wax 40g

The express universal wax is the larger version of the natural skin+ski wax. This classic paraffin wax is suitable for all types of snow for both ski skins and skis.

→ It is applied the same way as the natural skin+ski wax.

### Protective netting

Colltex ski skins with a hotmelt adhesive coating are protected by a special net when not in use. This also makes it easier to separate the adhesive layers, while the adhesive remains intact.

→ When removing a ski skin, apply the protective net on one half of the ski skin, and then stick the second half of the skin onto it.

### Skin sock

Instead of the protective net, you can also use the pro-skin sock for protection. This skin sock offers advantages in any wind and weather conditions and are easier to apply than the nets.

→ Pull the pro-skin over the skin that has been removed from the back and stick the second half of the skin to the outside of the skin sock.

### Colltex tote bag

Pack the ski skin into the Colltex tote bag to keep the inside of the backpack dry.

→ Dry the ski skin after the tour and store it in the tote bag that can easily be hung on the ski tip or the binding by its loops.

For applications, also see [www.colltex.ch/video](http://www.colltex.ch/video)

## COLLTEX RE-COATING

The perfect adhesive coating on tour

### Hotmelt tape

The hotmelt tape is suitable for a complete renewal of the hotmelt adhesive coating.

→ Remove the old adhesive coating with a blade and heat. Tip: remove the old adhesive with a soldering iron with spatula attachment. Then use an iron to transfer the new adhesive from the tape to the back of the ski skin.

### Hotmelt tube 75ml

The adhesive from the hotmelt tube is a flexible way to re-coat part or all of the ski skin.

→ Clean the adhesive side of the ski skins and evenly spread the adhesive with a spatula or roller. Tip: remove the old adhesive with a soldering iron with spatula attachment.

### Quickspray

Quickspray is the very best option for a spontaneous re-coating on the evening before a tour. As quickspray should dry for 15 minutes, its application on the mountain when exposed to wind and weather, is not ideal.

For such a purpose, we recommend quicktex.

→ spray quickspray evenly on the ski skin and let dry.

### Quicktex

Quicktex solves adhesion problems on the mountain. It is small, light, efficient, and suitable for ski skins of all brands. Once the tour is over, quicktex can be removed and the adhesive coating renewed properly.

→ Use quicktex like a double-sided adhesive tape.

### Our Re-coating Service

You can have your skins re-coated by our Colltex professionals.

→ Simply send us your ski skin directly or via your sports shop to Glarus or use the «Ski-Skin Re-coating Service». The price includes everything from postal charges to send it to the return shipment, the re-coating itself, and the waterproofing (only in CH/FL).

For applications, also see [www.colltex.ch/video](http://www.colltex.ch/video)

## COLLTEX SPARE PARTS

The whole range at a glance

### Hexagon skin clip

2 skin clips with tip plate  
rivet heads and rivet bucktails

### EVO skin clip

2 skin clips with tip plates and  
rivet heads and rivet bucktails.

### STD skin clip

2 skin clips with tip plates and  
rivet heads and rivet bucktails.

### Racefix Kit

Self-assembly kit consisting of 2 elastic bands,  
2 hinged cord stoppers, and 2 washers, 2 tip  
plates with 6 rivet heads and rivet bucktails

### Foam Roller

To apply the hotmelt adhesive

### Hexagon tail-hook set

Self-assembly with two Hexagon tail hooks,  
2 perforated tapes, plus 6 rivet heads and rivet  
bucktails

### Camlock tail-hook kit

This handy self-assembly kit consists of  
2 camlock tail hooks, 2 perforated tapes,  
6 rivet heads and rivet bucktails.

### Hexagon tail hooks

Tail attachments (only hooks)

### Camlock tail hooks

Tail attachment (only hooks)

### Tail-hook set splitboard «splend»

Tail hooks for splitboard: 2 tail hook plates,  
2 perforated tapes, 6 rivet heads and rivet  
bucktails

## MARKETING

Sales support and giveaways

### Plexiglas® Pattern

Thanks to the Plexiglas® pattern, the sales department can provide customers with the best possible advice.  
On the back of the Plexiglas®, there is a brief description of the material and target group of the respective  
ski skin.

### Giveaway

For your sales efforts or as a thank-you gift to your customers, you may make your customers a present in  
connection with the ski skin → Get the respective giveaways from Colltex at cost price.
