THE 2027/28 **COLLTEX SKIN RANGE**

Product Overview

Product content

TÖDI CRYSTAL

- Mohair/polyamide mix allrounder
- Good glide and grip
- For beginners to pros

MIX
65% MOHAIR +
35% POLYAMID
102 G (6 X 150 CM)

BEGINNER PRO

Description

TÖDI – the great classics. Their mohair-polyamide mix guarantees top grip, glide, and robustness.

Target Group

TÖDI: for all-rounders who want the best-sellers –robust, durable, with a reliable grip and good glide.

LUCENDRO

- Techfibre weave
- Excellent grip
- For beginners and fun skiers

100% TECHFIBRE
111 G (6 X 150 CM)

BEGINNER PRO

LUCENDRO – the special ‹Techfibre› weave guarantees top grip and a good glide.

LUCENDRO: for beginners or connoisseurs of a good grip with no danger of slipping backwards.

PALÜ

- Pure mohair
- Excellent glide
- For experienced touring skiers

100% MOHAIR
105 GRAMM (6 X 150 CM)

BEGINNER PRO

PALÜ – 100% mohair skins for a perfect glide – especially in mid-winter in extreme cold and on fresh snow.

PALÜ: for pros who love high-Alpine tours, value a good glide, and master their technique.

RACE

- Specially woven mohair
- Maximum gliding performance
- For ambitious and competitive skiers

100% MOHAIR
98 G (6 X 150 CM)

BEGINNER PRO

RACE – special-weave, 100% mohair skins designed for top glide, albeit somewhat at the expense of grip.

RACE: for competitive skiers, who want light-weight, practical skins with a perfect glide for training and competition.

All ski skins feature the proven hot-melt self-adhesive layer.
Advantage: the ski skins stay in place in all weathers and all types of snow.

All ski skins also feature the Colltex Drybase coating.
Advantage: the ski skins absorb virtually no water and stay light and dry.

All skins also benefit from the Colltex Edge treatment.
Advantage: the edges of the skins will not fray.

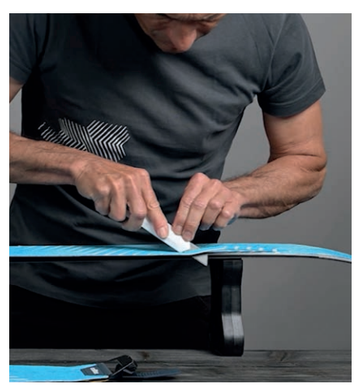

Colltex has long abandoned using fluoride for many years.
Advantage: respect of nature.

New box with
Eurohole hanger

Depending on cut, cutters and a tail-hook kit are included.

MAINTENANCE

Eco skinproof
Ecological waterproofing of ski skins. Improved glide, less water absorption and less snow build-up. Spray on dry skins and leave to dry for 2 hours.
Art.-Nr. 10569

Natural skin + ski wax 40g
Organic wax for ski skins and coating. Improved glide and less snow build-up. Ideal for when you're on the go.
Art.-Nr. 23132

Express universal wax
Paraffin wax for ski skins and coatings. Improved glide and to prevent snow build-up. Ideal for when you're on the go. Art.-Nr. 4437

Pro skin
Alternative to the protective nets. The socks are easy to use and protect against skins sticking together, dirt, and drying out. Art.-Nr. 7105

Protective nets
Reusable, the nets prevent the skins from sticking together, dirt, and drying out.
Art.-Nr. 5272 (140 mm, 2 x 95 cm)
Art.-Nr. 5271 (90 mm, 2 x 95 cm)
Art.-Nr. 7372 (140 mm, roll 30 m)

Ski-skin bag
To transport and store ski skins. Store skins in the bag once they are dry.
Art.-Nr. 85101

NEW COATINGS

Hotmelt tape
For a complete renewal of the hot-melt adhesive layer. Remove old adhesive as thoroughly as possible with a spatula and heat. Apply the new adhesive with an iron.
Art.-Nr. 15000 (150 mm, 4 m)
Art.-Nr. 15001 (110 mm, 4 m)
Art.-Nr. 15003 (150 mm, roll 50 m)
Art.-Nr. 15002 (110 mm, roll 50 m)

Hotmelt adhesive 75ml
For total or partial hot-melt recoating. Remove old adhesive with a spatula and heat. Apply the new adhesive with a roller or spatula.
Art.-Nr. 81101

Quicktex
The solution for express re-coating in the mountains. Small, light-weight, and effective on all skin brands.
Art.-Nr. 81301

Recoating Service
For Colltex ski skins within CH/FL only
The simplest all-round service for end customers and sports retailers.
The price includes packaging, transport and re-coating.
Art.-Nr. 16293 (CH/FL) with pre stamped shipping bag.
